NEGATIVE RATE VS AVG RATING

STORE PERFORMANCE SNAPSHOT

Underperforming store target neg rate = 20% | $R^2 = 0.86$

Store	Avg Rating	Positive Rate %	Negative Rate %	Rating Gain
Randwick	3.59	62.10	36.40	0.71
Parramatta	3.84	62.70	34.70	0.46
Marrickville	3.97	70.00	30.00	0.34
Cronulla	4.60	88.60	11.40	0.00
Newtown	4.64	83.60	13.40	0.00
Circular Quay	4.64	85.70	13.10	0.00

Regression ($R^2 = 0.86$) confirms service complaints drive 86% of rating variance. Bringing Randwick, Parramatta and Marrickville to brand average unlocks +0.34 to +0.71★ per store — achievable through staff training alone, no product changes required. Power BI · Apify · Claude API · DAX

Key Insight

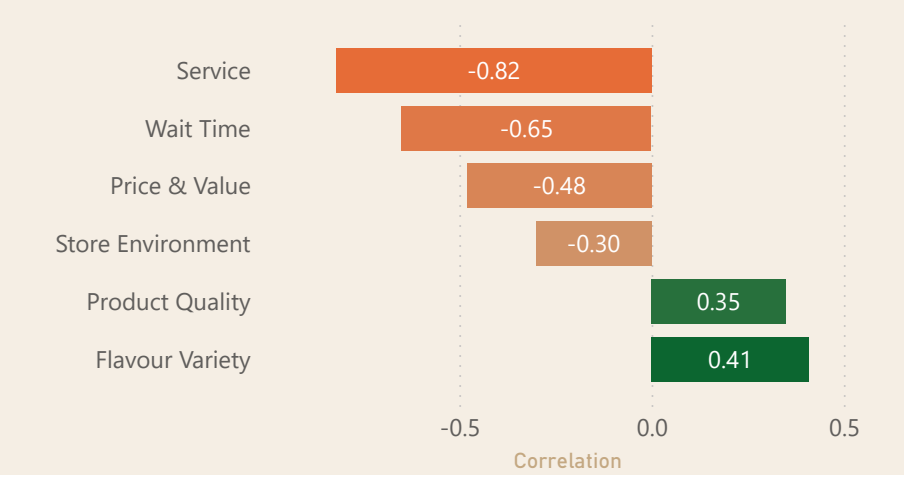

Store performance is highly uneven across Sydney. Ratings range from 3.59★ (Randwick) to 4.64★ (Circular Quay) — a gap of nearly a full star within the same brand. Randwick, Parramatta and Marrickville post negative rates of 30–36%, compared to just 10–14% at top performers Bondi, Miranda and Cronulla. The problem is not brand-wide — it is store-specific.

Key Insight

Service is the most dangerous category. It ranks 2nd in total mentions (287) but carries the highest negative rate — and shows the strongest correlation with low store ratings ($r = -0.82$). The heatmap confirms Parramatta and Randwick dominate the Service and Wait Time columns, with complaint counts 2–3× higher than the network average. Flavour Variety remains a consistent strength across all stores.

The scoop on what needs to *change*?

Priority Action Matrix

 Fix First Service Quality Staff training Problem resolution Consistency	 Plan For Wait Time Queue management Peak hour staffing Order flow design
 Maintain Flavour Variety Keep innovation Limited editions Seasonal menu	 Monitor Price & Value Value perception Loyalty offers

Key Insight & Recommendation

Staff training is the single highest-ROI action. Regression ($R^2 = 0.86$) projects gains of +0.19 to +0.71★ for underperforming stores — achievable without any product changes. Miranda and Cronulla provide the proven internal model to replicate.
